

#	Scientific Discovery	Bible Reference	Date of Reference	Description
1	The stars are too great in number to count	Genesis 15:5 Jeremiah 33:22 Hebrews 11:12	1450-1410 BC 627-585 BC 64-68 AD	19th Century AD with the advent of powerful telescopes. Prior to this, most thought there were no more than 6,000 stars (what could be seen with the naked eye from all points on the earth).
2	The Earth is shaped like a sphere (round) and rotates	Job 38:12, 14 Isaiah 40:22 Luke 17:34-36	950 BC or earlier 746-680 BC 60 AD	Luke 17:34-36 depicts Christ's Second Coming as happening while some are asleep at night and others are working at day-time activities in the field, an indication of a rotating earth with day and night at the same time.
3	Light travels in a path, darkness does not	Job 38:19	950 BC or earlier	Scientists now know that light is a form of energy called radiant energy, and that it travels in electromagnetic waves at the speed of approximately 186,000 miles per second (660 million m.p.h.) in a straight line. For example, it takes about 8 minutes for light to travel its "path" from the Sun to the Earth.
4	The universe is expanded from its original size	2 Samuel 22:10 Ezekiel 1:22 Isaiah 40:22 Isaiah 42:5 Isaiah 44:24	The first reference occurs in about 1000 BC; the last in about 518 BC (a span of almost	Edwin Hubble found evidence the universe has expanded in 1927.

		Isaiah 45:12 Isaiah 48:13 Isaiah 51:13 Job 26:7 Zechariah 12:1	500 years).	
5	Earth floats freely in space	Job 26:7	950 BC or earlier	
6	Life is in our blood	Leviticus 17:11 Leviticus 17:14	1450-1410 BC 1450-1410 BC	During George Washington's day, the practice of blood-letting to treat various kinds of illnesses was common. In fact, George Washington died from this very treatment. In 1830 AD, Dr. Marshall Hall came out in strong opposition to this practice
7	Laughter can promote physical healing	Proverbs 17:22	950 - 700 BC	It appears that this was discovered within the past 10 - 50 years by scientists
8	The Jet Stream	Ecclesiastes 1:6	935 BC	First discovered by airmen during WW II.
9	Hydrological cycle	Job 36:27-28 Amos 9:6	950 BC or earlier 755 BC	
10	Anthropic Principal	Isaiah 45:18	746-680 BC	<i>the Anthropic Principle</i> states that the universe appears to be carefully designed for the well-being of mankind
11	Dinosaurs and humans existed at the same time	Job 40:15-24	950 BC or earlier	Modern science is still playing catch-up to the Bible on this issue.
12	Entropy	Psalms.102:2 5-26 Isaiah 51:6 Hebrews	About 1000 BC 740-680 BC 64-68 AD	Rudolf (Julius Emanuel) Clausius formulated the Second Law of

		1:10-11		Thermodynamics in 1850.
13	All things are made up of sub-atomic particles that are invisible to the naked eye	Hebrews 11:3	64-68 AD	The first sub-atomic particle to be discovered by modern science was the electron. It was first discovered by J.J. Thomson in 1897.
14	Time had a beginning	1 Timothy 1-8-9	63 AD	It appears to be related to the discovery of Second Law of Thermodynamics and recent observations made in the science of cosmology.
15	Modern communications, perhaps even satellite television broadcasts	Job 38:35	950 BC or earlier	Science didn't discover this until 1864 when "the British scientist James Clerk Maxwell suggested that electricity and light waves were two forms of the same thing"
16	The oceans have circulating currents or 'paths'	Psalms 8:8 Isaiah 43:16	About 1000 BC 746-680 BC	Late 1800's. Dr. Matthew Maury is considered one of the major founders of the science of oceanography. He was also a creationist who believed in the absolute authority and accuracy of the Bible. One day while he was sick in bed, he asked his son to read the Bible to him. One of the verses his son read was Psalms

				8:8. That particular verse mentioned "paths" in the seas. Believing that the Bible must be correct about these "paths", he set out to find them. As a result, Dr. Maury was the first to discover (in modern times) that the seas were circulating systems with interaction between wind and water.
17	There are springs that arise from the ocean floor	Job 38:16	950 BC or earlier	The earliest secular references to these springs was by the Roman geographer Strabo, who lived from 63 BC to 21 AD.
18	Mountains and deep valleys exist on the ocean floor	Job 38:16 Jonah 2:5-6	950 BC or earlier 840 or 586 BC	The Challenger expedition (1873-1876) commenced the first scientific exploration of the ocean floor, during which a canyon 5 1/2 miles deep was discovered in the Pacific.
19	The Existence of Germs	Leviticus 15:13	1450-1410 BC	Up until 100 years ago doctors washed their hands in a basin of still water, resulting in the death of multitudes. We now know that doctors must wash their hands under running water. The <i>Encyclopedia Britannica</i> documents that in 1845, a young doctor in Vienna named Dr. Ignaz Semmelweis was horrified at the terrible death rate of women

				<p>who were dying after giving birth in hospitals. As many as 30% of those giving birth died. The Doctor noted that doctors would examine the bodies of those who had died, then, without washing their hands, go straight to the next wards and examine expectant mothers. This was their normal practice, because the presence of microscopic diseases was unknown. Doctor Semmelweis insisted that doctors wash their hands before examinations, and the death rate immediately dropped down to 2%.</p>
20	The Amount of Water on Earth	Isaiah 40:12	746-680 BC	<p>We are told that God has measured the waters and set a proper amount of water on the earth. Modern science has proved that the quantity of water on earth is just enough for our needs. If the sea became three meters deeper, the water would absorb all the carbon dioxide and nitrogen, and no creature could live any longer.</p>
